

For Immediate Release

Aquatic Solutions Conference

on electrical actuated underwater applications

The Aquatic Solutions Conference (ASC) is a nonprofit international conference dedicated to the advancement of the professional and technical understanding of underwater solutions focusing on electrical actuators. By providing an independent platform, the ASC is able to generate a strong network where science and practice meet to find real solutions for real challenges.

The conference combines both academia and maritime industry professionals to discuss their current issues as well as look into the ever-changing technologies available to meet future requirements. Participants from the Maritime industry and Maritime Research Institutions will seek and discuss opportunities for further development of electrical actuated underwater applications. Some of the application areas covered include:

- Offshore / Oil & Gas
- Environmental Research and Cleaning
- Inspection and Maintenance
- Search and Rescue
- Entertainment

This year, the Aquatic Solutions Conference will be held on **May 3rd** in New Orleans, LA, co-located with the XPONENTIAL (AUVSI) Show. The conference provides academicians and industry professionals the opportunity to explore, share and discuss new ways for underwater challenges.

maxon motor and DFKI

maxon motor and DFKI join forces to enhance the state of technology in this field of application. Both industry and academia profit from a closer collaboration and exchange of experience and technology. Based on our expertise, maxon and DFKI decided to organize an independent platform to merge these groups and explore today's solutions and future possibilities. Within this platform, participants will:

- Learn about new Maritime technologies and the solutions that exist for challenging applications
- Network with others in the industry to develop partnerships to promote growth
- Work together to define specific standards
- Improve your knowledge of the current market trends in the industry
- Connect with the leading research institutions and industry players
